PROFILE

Software engineer with 5+ years of experience building, optimizing, and scaling Ruby on Rails SaaS applications in production. Strong background in RESTful/GraphQL API design, background job processing, PostgreSQL performance tuning, and third-party system integration. Comfortable owning features end-to-end — from architecture to deployment — within distributed Agile teams, with growing hands-on experience applying AI tools (LLM integration, Copilot, Cursor) to speed up development.

PROFESSIONAL EXPERIENCE

Backend Developer — IndigoDev

May 2023 – Present · Remote, Ukraine

- Designed and maintained REST and GraphQL APIs for internal teams and external integrations.
- Implemented background job processing with Sidekiq, improving API response time and system throughput by ~20%.
- Optimized PostgreSQL queries and improved database performance under production load.
- Owned backend features end-to-end: architecture, implementation, testing, and deployment.
- Maintained high test coverage with RSpec, improving overall system reliability.

Tech stack: Ruby, Rails, PostgreSQL, Sidekiq, Redis, RSpec, React, MongoDB, Node.js, DigitalOcean

Backend Developer — Syndicode

December 2021 – May 2023 · Remote, Ukraine

- Developed and maintained scalable Ruby on Rails SaaS applications for high-growth products.
- Improved PostgreSQL performance through query optimization and indexing.
- Integrated third-party services and ensured production stability.
- Participated in code reviews and Agile development processes.

Tech stack: Ruby, Rails, PostgreSQL, Heroku, Sidekiq, RSpec, Swagger

Backend Developer — DigitalSuits

June 2021 – December 2021 · Remote, Ukraine

- Refactored and optimized legacy Rails codebases to improve maintainability.
- Implemented automated testing strategies using RSpec.
- Investigated and resolved production issues to ensure business continuity.

Tech stack: Ruby, Rails, PostgreSQL, RSpec

TECHNICAL SKILLS

Languages: Ruby, JavaScript (ES6+)
Frameworks: Ruby on Rails (6/7/8), Hotwire (Turbo, Stimulus), React, Node.js (Express)
Architecture & Principles: OOP, SOLID, MVC, Domain-Driven Design (DDD), Clean Architecture, RESTful API Design
Rails Ecosystem: ActiveRecord, ActiveJob, ActionCable, Devise, Pundit, Service/Form Objects, Kaminari/Pagy
Databases: PostgreSQL (query optimization, indexing), MongoDB, Redis, SQLite
Background Processing: Sidekiq, asynchronous job processing
Testing: RSpec, Capybara, TDD, BDD, test automation
DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, GitLab CI
Cloud: AWS (EC2, S3, RDS – basics), Heroku, DigitalOcean
API & Integrations: REST, GraphQL, JSON API, Swagger/OpenAPI, third-party integrations
AI Tools: GitHub Copilot, Cursor AI, ChatGPT, Claude, LLM integration (OpenAI/Anthropic APIs)
Automation: n8n, Zapier, Make (Integromat), Webhooks
Developer Tools: Git (GitHub/GitLab), Postman, Linux/Bash, Jira, Trello, VS Code, RubyMine

EDUCATION & CERTIFICATIONS

Ruby on Rails Developer Certification
Goodprogrammer Online Academy · May 2019 – October 2019

Bachelor's Degree in Finance
Kyiv University of Management, Ukraine · September 2007 – May 2011

LANGUAGES

Ukrainian: Native
English: B1–B2 (Upper-Intermediate)
Italian: A2–B1 (Fondazione San Carlo, in progress)

SOFT SKILLS

- Strong ownership mindset and ability to work independently
- Effective communication in distributed, cross-cultural Agile teams
- Analytical problem-solver with a focus on performance and reliability
- Continuous learner, actively improving architecture and engineering practices
